

SPRINGER-MILLER SYSTEMS

SPASOFT® AND ADACO INVENTORY CONTROL SYSTEM INTERFACE

Functionality

SpaSoft's two-way inventory control interface utilizes our web servicing technology, SMS|Diplomat, to provide seamless integration with Adaco. The interface uses a collection of XML messages to deliver a real-time notification framework that drives efficiency in the retail sales environment.

Adaco has developed industry leading inventory control software systems for their hospitality and retail customers since 1985.

Benefits

Integration eliminates discrepancies in data between systems that can lead to inaccurate information, poor customer service, missed revenue opportunities and costly mistakes.

SpaSoft's interface allows both systems to have improved accuracy of information and overall efficiency through:

- Direct management of all the spa's retail inventory from Adaco
- Real-time messaging of all sales data from SpaSoft
- Real-time delivery of all statistical inventory data from Adaco in SpaSoft

Communicated Information

Your SpaSoft interface to Adaco will exchange the following information:

INFORMATION SENT	SYSTEM DIRECTION	TIMING
Retail Inventory Statistical Import	Adaco to SpaSoft	Real-time
Retail Sales Statistical Export	SpaSoft to Adaco	Real-time

SPRINGER-MILLER SYSTEMS

SPASOFT® AND ADACO INVENTORY CONTROL SYSTEM INTERFACE

Software Requirements

The interface is compatible with, and requires, the following versions of Springer-Miller's software:

- SpaSoft v3.3 or higher
- SMDiplomat v3.6 or higher

For Adaco's software requirements please contact them directly.

Hardware Requirements

For full specifications on the hardware requirements, please contact your Installed Account Manager or Sales Representative for a current copy of our Exhibit A - Hardware Requirements document.
