## SPRINGER-MILLER SYSTEMS

### SMS|HOST® AND ARIANE SYSTEMS KIOSK SOFTWARE INTERFACE

#### Interface Functionality

SMS|Host's Check-In & Check-Out Services interface utilizes our web servicing technology, SMS|Diplomat, to provide seamless integration with Ariane Systems.

Ariane System's Kiosks provide hotel guests with a user friendly and intuitive self-service solution. The interface between SMS|Host and Ariane Kiosk will deliver a seamless check-in and check-out process for your guests.

The SMS|Host Check-In & Check-Out Services interface to Ariane Systems wraps XML messages within the HTNG 1.1 SOAP protocol to communicate directly between the applications. This industry standard provides the framework that enables the SMS|Host application to send and receive information to and from Ariane in real-time, thereby enabling a truly cooperative processing environment.

#### Core Benefits

Cooperative system integration leads to improved service deliveries and ultimately a more enjoyable guest experience. The SMS|Host to Ariane Systems Kiosk interface solution provides:

- A streamlined guest service delivery through expediting their check-in and check-out processes.
- A secure, integrated payment processing solution including a Chip & PIN compliant option through our partners at Servebase
- An automated, guest-driven check-in and check-out process thereby reducing the amount of traffic at the hotel's front desk and potentially lowering the hotel's operating costs.

#### Communicated Information

Your SMS|Host Hospitality Management System and Ariane Systems Kiosk interface will exchange the following information:

INFORMATION SENT	SYSTEM DIRECTION	TIMING
Check-in/out update	Ariane to SMS Host	Real-time
Folio inquiry/results*	SMS Host to Ariane	Real-time
Reservation value inquiry/results*	SMS Host to Ariane	Real-time
Server status inquiry/results*	SMS Host to Ariane	Real-time

\*Indicates inquiry initiated by Ariane Systems
