

SPRINGER-MILLER SYSTEMS

SPASOFT® AND DATAWORKS NEXT® INVENTORY CONTROL

Functionality

SpaSoft's two-way inventory control interface utilizes our web servicing technology, SMS|Diplomat, to provide seamless integration with NeXT. The interface uses a collection of XML messages to deliver a real-time notification framework that drives efficiency in the retail sales environment.

Dataworks Inc. has developed industry leading inventory control software systems for their hospitality and retail customers since 1986.

Benefits

Integration eliminates discrepancies in data between systems that can lead to inaccurate information, poor customer service, missed revenue opportunities and costly mistakes.

SpaSoft's interface allows both systems to have improved accuracy of information and overall efficiency through:

- Direct management of all the spa's retail inventory from the NeXT
- Real-time messaging of all sales data from SpaSoft
- Real-time delivery of all statistical inventory data from NeXT in SpaSoft

Communicated Information

Your SpaSoft interface to Dataworks NeXT will exchange the following information:

INFORMATION SENT	SYSTEM DIRECTION	TIMING
Retail Inventory Statistical Import	NeXT to SpaSoft	Real-time
Retail Sales Statistical Export	SpaSoft to NeXT	Real-time

SPRINGER-MILLER SYSTEMS

SPASOFT® AND DATAWORKS NEXT® INVENTORY CONTROL

Software Requirements

The interface is compatible with, and requires, the following versions of Springer-Miller's software:

- SpaSoft v3.3 or higher
- ^{SMS}|Diplomat v3.6 or higher

For specific NeXT requirements please contact Dataworks.

Hardware Requirements

For full specifications on the hardware requirements, please contact your Installed Account Manager or Sales Representative for a current copy of our Exhibit A - Hardware Requirements document.
