# SMS

SPRINGER-MILLER SYSTEMS
SMS|HOST® AND DUETTO RMS INTERFACE

Interface Functionality

Springer-Miller Systems' SMS|Host's two-way interface provides seamless integration to the Duetto Revenue Management System (RMS). It utilizes a hybrid delivery method that provides data-rich flat-files over an SFTP connection and imports rate recommendations via XML messaging.

Duetto delivers a revenue strategy solution for hotels of all shapes and sizes. A comprehensive revenue strategy means much more than simply pricing hotel rooms. It includes analyzing consumer behavior and the wealth of information now available to make smarter decisions, and it's critical to driving healthy revenue, making informed distribution choices, and optimizing profitability.

Utilizing new consumer-centric data sets such as web shopping regrets and denials, social review, air traffic, weather and more, Duetto delivers powerful insights on pricing and demand, which translates into increased revenue and higher profitability.

Interface Benefits

SMS|Host's interface to Duetto delivers a strong two-way integration that allows your organization to:

- Effectively distribute and maintain your hotel's inventory
- Identify and execute sales strategies
- Maximize occupancy and increase ADR
- Accurately forecast business demands

SPRINGER-MILLER SYSTEMS
SMS|HOST® AND DUETTO RMS INTERFACE
