

SPRINGER-MILLER SYSTEMS

SPASOFT® AND YELLOW DOG INVENTORY CONTROL SYSTEM INTERFACE

Functionality

SpaSoft's two-way inventory control interface utilizes our web servicing technology, SM|Diplomat, to provide seamless integration with Yellow Dog. The interface uses a collection of XML messages to deliver a real-time notification framework that drives efficiency in the retail sales environment.

Yellow Dog has developed industry leading inventory control software systems for their hospitality and retail customers since 2006.

Benefits

Integration eliminates discrepancies in data between systems that can lead to inaccurate information, poor customer service, missed revenue opportunities and costly mistakes.

SpaSoft's interface allows both systems to have improved accuracy of information and overall efficiency through:

- Direct management of all the spa's retail inventory from Yellow Dog
- Real-time messaging of all sales data from SpaSoft
- Real-time delivery of all statistical inventory data from Yellow Dog in SpaSoft

INFORMATION SENT	SYSTEM DIRECTION	TIMING
Retail Inventory Statistical Import	Yellow Dog to SpaSoft	Real-time
Retail Sales Statistical Export	SpaSoft to Yellow Dog	Real-time

SPRINGER-MILLER SYSTEMS

SPASOFT® GUEST SELF SERVICE INTERFACE WITH RYATTA

Software Requirements

The interface is compatible with, and requires, the following versions of Springer-Miller's software:
