Interface Functionality

Springer-Miller System's Sales and Catering interface with iVvy Venues offers an XML interface using SMS's web servicing technology to provide seamless and near real-time integration to iVvy's Sales and Catering platform. The interface exchanges data pertaining to group blocks and rates as well as group reservations.

Interface Benefits

SMS|Host's Integration eliminates discrepancies in data between systems that can lead to inaccurate information, poor customer response times and missed opportunities.

- Receive & create new Group Information, Block and Rates from iVvy.
- Ability to manage group blocks in either system.
- Ability to book reservations in either system as well as modify and cancel them.
- Send base-line rate to use for building rates in iVvy.
- Deliver inventory and availability to iVvy.

Information Sent

Group Block Creation	iVvy to SMS (near real-time)
