

## SPRINGER-MILLER SYSTEMS

### <sup>SMS</sup>|Host Secure Data Extract

Springer-Miller Systems' Secure Data Extract (SDE) provides a framework to support automated, schedulable, one-way data exports from the <sup>SMS</sup>|Host PMS to complimentary hospitality systems.

#### Functionality

Acting as a protective gateway to your system, the SDE facilitates rapid, reliable and more frequent access to the data that hospitality product vendors need in order to provide services to you and your guests.

Utilizing a custom profile for each vendor, the SDE targets the databases they require and tracks all changes compressing, encrypting and transporting them automatically via a secure channel on a scheduled basis.

#### Secure Data Extract Benefits

By employing Springer-Miller's SDE, properties gain the following benefits:

- Security: increase security through the elimination of direct and uncontrolled external access to <sup>SMS</sup>|Host
- Protection: sensitive data are removed prior to export while encryption in transmission complies with data privacy requirements
- Reliability: consistent and dependable delivery of data
- Automation: fully autonomous processing means no manual intervention
- Speed: much smaller data feeds result in much shorter transmission periods
- Frequency: smaller extracts create the potential for greater frequency of exports
- Economy: the SDE supports multiple vendor exports from a single process
- Performance Safeguard: reliance on a sanctioned export protects against unintended performance degradation

#### Sanctioned Exports

SMS has a growing library of SDE Vendor Exports to which properties can subscribe. These support products addressing Owner and Member communications, Business Intelligence, Customer Relationship Management, Sales & Marketing services and more. Please contact your Account Manager to validate your current vendor arrangements and help ensure a smooth transition for those products with your next update.

## SPRINGER-MILLER SYSTEMS

### <sup>SMS</sup>|Host Secure Data Extract

#### Software Requirements

The product is compatible with, and requires, the following versions of Springer-Miller's software:

- <sup>SMS</sup>|Host v22.1 or higher
- An approved SDE interface with partner system.

#### Hardware Requirements

The product requires the following:

- Multi-Interface Processor  
(see Exhibit A, Rev. 5, Section 3, page 8 for details)

#### Low Cost

The pricing for each SDE Export has been set extremely low in order to minimize cost considerations and encourage properties to install valid and secure Exports for all of their non-interface 3<sup>rd</sup> party services:

- License: Fee Waived
- Installation: \$500 fixed rate
- Annual Maintenance: \$150 @ month (\$1,800)
