SMS|Host Scheduled File Export (SFTP) with Shogo

Springer-Miller Systems' Scheduled File Export (SFE) provides a framework to support automated, schedulable, one-way exports of data in a CSV format from the SMS|Host PMS to complimentary hospitality systems. Shogo is a cloud-based business automation service that automatically posts Point-of-Sale or eCommerce sales data directly to your accounting system.

Functionality

Acting as a protective gateway to Users' systems, the SFE facilitates rapid and reliable access to files that a property wants to share with vendors or other external entities. Utilizing a flexibly configured scheduler, files designated for transport, either by naming convention or specific location, will be automatically forwarded to a validated set of SFTP credentials at the destination. This transmission mechanism accommodates the CSV export of a report, the output of a utility that has been run in the PMS or a file manually placed in a location for external transport.

Scheduled File Export Benefits

By employing Springer-Miller Systems' SFE, properties gain the following benefits:

- Security: increased through elimination of direct/uncontrolled external access to SMS|Host
- Protection: reliance on SFTP ensures that all files are transported in an encrypted format
- Reliability: consistent and dependable delivery of data
- Automation: fully autonomous transport processing
- Frequency: scheduling ensures files are sent when they are expected
- Economy: the SFE can support multiple vendor exports from a single installation
- Performance Safeguard: reliance on an official export protects against unintended performance degradation.
Background

Springer-Miller Systems' Personal Data Privacy Controls package does not support the harvesting of data by external parties directly from a property's system and requires officially sanctioned exports for all vendors that utilize data from SMS|Host.

Low Cost

The pricing for all SFE Exports has been set extremely low in order to minimize cost considerations and encourage properties to install valid and secure Exports for all of their non-interface 3rd party services:

- License: Fee Waived
- Installation: $500 fixed rate
- Annual Maintenance: $400

SMS|Host Scheduled File Export (SFTP) with Shogo

Exported Content for Shogo

Shogo utilizes data from the SMS|Host Back Office interface. The output file contains a summary of the day's financial activity by General Ledger number for a single property or separate files generated for individual multi-properties. The exported text file can be formatted as Comma Delimited (CSV), Tab Delimited, Fixed Length (separated by commas) or Standard Data Format (fixed length fields without separation).

Beginning with the 2021 R1 release of SMS|Host, the generation and export process can be added as a Task to the Automated Night Audit. The export will be routed to a designated file location and automatically transported via SFTP to Shogo. Following transmission, the file(s) will be relocated to a sub-folder indicating they have been sent.

Software and Hardware Requirements

The product is compatible with, and requires, the following versions of Springer-Miller's software:

- SMS|Host version 22.7 and higher
- SMS Multi-Interface Processor (see Exhibit A, Rev. 5.0, Section 3, page 8 for details)
