SMS|HOST ® AND ALOHA POS INTERFACE

Interface Functionality & Benefits

SMS|Host's 'Level 1' POS interface with Aloha utilizes a serial (RS232) communication protocol to provide seamless integration.

The interface allows both systems to have improved accuracy of information and overall efficiency through:

- Pre-posting inquiries that provide the Aloha user with detailed SMS|Host guest and reservation data
- Posting of charges from Aloha to the SMS|Host system

ALOHA POS

NCR's Aloha is an end-to-end solution that helps operators like you embrace digital transformation to run every aspect of your restaurant. Drive on-and off-premise revenue, streamline management and exceed guest expectations with our restaurant technology. With an all-in-one subscription model, core capabilities include fixed and mobile point-of-sale hardware, contactless dining**,** real-time alerts and analytics up to the second, online ordering, third-party delivery integrations, 24/7 dedicated customer support, payments and more.

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current release of the SMS Product Suite
- Multi-Interface Processor (see Exhibit A - Hardware Requirements document)
- Requires RS232 connection

Please contact an NCR representative to learn more about their software and hardware requirements.
