

SMS|HOST® AND SALIDO INTERFACE

Interface Functionality & Benefits

SMS|Host's 'Level 2' POS interface utilizes our web servicing technology, SMS|Diplomat to provide seamless integration with the SALIDO Point of Sale application.

The interface allows both systems to have improved accuracy of information and overall efficiency through:

- Pre-posting inquiries that provide the SALIDO user with detailed SMS|Host guest and reservation data
- Posting of detailed charges from SALIDO to the SMS|Host system
- Real-time (zoom) check-level data from SALIDO to the SMS|Host user

SALIDO POS

Whether you're running a full-service, casual, upscale casual, or fine-dining establishment, SALIDO will unify all your restaurant operations under one convenient interface. All while serving as the comprehensive hospitality payments and back-office solution. Best of all, we're backed by North American Bancard (NAB), the sixth-largest non-bank merchant acquirer on the continent. That means we know what we are doing when it comes to restaurant POS systems and payment processing.

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current release of the SMS Product Suite
- Diplomat Type II server (see Exhibit A - Hardware Requirements document)

Please contact a SALIDO representative to learn more about their software and hardware requirements.

Communicated Information

Your SMS|Host system and SALIDO POS interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Pre-posting inquiry
Posting of detailed charges
Check-Zoom
