Teres

SOLUTION OVERVIEW

A tguest-centric point-of-sale solution designed to enhance both food and beverage and retail operations.

Point-of-Sale Solution

Flexible and easy to use, guest-centric Teres Point of Sale is designed to handle the needs of any hotel or resort. With customizable screens and unlimited options, Teres POS accommodates any property and is easily adaptable to fit the way you operate.

Complete Integration

Fully integrated with our SMS|Host property management solution - allowing enhanced posting, diverse package options and seamless viewing capabilities between PMS and POS systems.

Highly Customizable

With unlimited room layouts and table configurations, you can leverage Teres POS to suit the needs of your property.

Fully Scalable Solution

Teres POS is easily capable of growing as the needs of your business change, whether you need to add more workstations or additional inventory items - Teres POS grows as you grow.

Easy to Use & Deploy

The logic behind our point-of-sale solution guides staff through the software, and with easy navigation of menus and tabs, mistakes will be greatly reduced.

Safer Payments

Regardless if your guests are inserting, tapping, or swiping, their information needs to be safe and secure at all times. We take pride in our extensive high-level security measures.

Improve Guest Satisfaction

Ease for guest & service with functions such as multiple split types, coursing, seat numbers assigning guest names, and on-screen signature capture. Our seamless dining process will create a memorable experience for your guests.
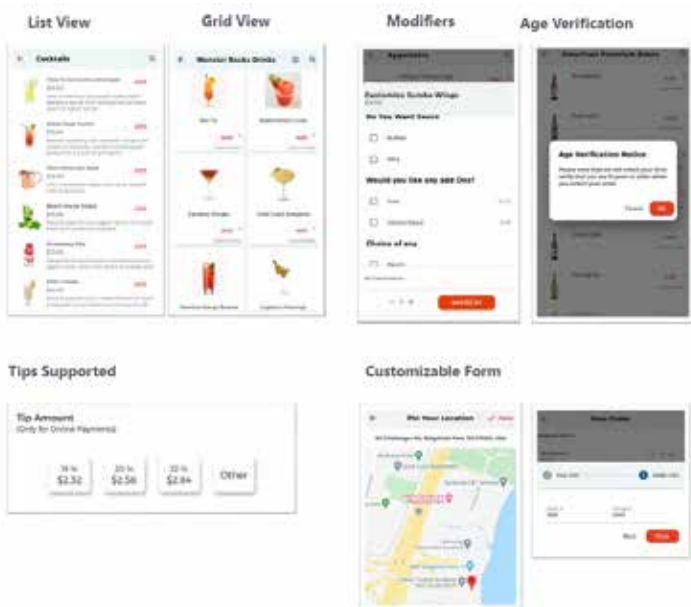

Teres

Mobile Web Ordering

A web-based technology that allows your guests to have a safe ordering experience

How It Works

Guest scans QR Code or enters a URL to create order and pay

Order submitted to POS and prints ticket in Kitchen

Staff marks the order completed and guest is notified by text message

Order is delivered to the room

List View | Grid View | Modifiers | Age Verification

Tips Supported

Customizable Form
