

SMS|HOST® AND BEACHY BOOKING INTERFACE

Interface Functionality & Benefits

Springer-Miller Systems' Level 3 Point-of-Sale interface utilizes our web servicing technology, SMS|Diplomat to provide seamless integration with Beachy's Attendant Booking and Guest Booking application.

The interface allows both systems to have improved accuracy of information and overall efficiency through:

- Pre-posting inquiries that provide the Beach Attendant Booking user with detailed SMS|Host guest and reservation data
- Posting of detailed charges from Beachy Attendant Booking and Guest Booking to the SMS|Host system
- Real-time (zoom) check-level data from Beachy to the SMS|Host user
- Daily posting of (non-guest room) summary data from Beachy Attendant Booking and Guest Booking to the SMS|Host system. This provides accurate reporting of all POS revenue center totals from within the SMS|Host system.

Beachy

Beachy has two solutions for amenity and activity bookings. The Beachy Attendant Booking solution is designed to empower your staff to improve guest experiences at your most coveted outdoor locations. Beachy's award-winning, paperless attendant amenity booking solution for beach and pool chairs, cabanas, jet skis, paddle boards and more, is designed to make fun easy. While the Beachy Guest Booking solution folds neatly into your resort website and allows guests to reserve amenities as easily as they book reservations.

Communicated Information

Your SMS|Host system with Beachy's Attendant Booking and Guest Booking interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Pre-posting inquiry

Posting of detailed room charges

Check Zoom

Business day summary totals
