ˢᴹˢ|HOST® AND BOOK4TIME INTERFACE

Interface Functionality & Benefits

Springer-Miller Systems' Level 1 Point-of-Sale interface utilizes a serial (RS232) communication protocol to provide seamless integration.

The interface allows both systems to have improved accuracy of information and overall efficiency through:

- Pre-posting inquiries that provide the Book4Time user with detailed reservation, C/L, and Member account data
- Posting of room charges from Book4Time to the ˢᴹˢ|Host system

Book4Time

Book4Time's platform handles everything from appointment booking and customer relationship management to yield management, inventory tracking, and KPI reporting all while ensuring your data is secure in the cloud with AWS.

Communicated Information

Your ˢᴹˢ|Host system and the Book4Time interface supports but is not limited to:

INTERFACE FUNCTIONALITY
Pre-posting inquiry (Guest Name, Reservation, C/L, and Member Account)
Posting of room charges (Reservation, C/L, and Member Account)

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current release of the SMS Product Suite
- Multi-Interface Processor (see Exhibit A - Hardware Requirements document)
- Requires RS232 connection

Please contact a Book4Time representative to learn more about their software and hardware requirements.
