

SMS|HOST® AND PASSKEY INTERFACE

Interface Functionality

Springer-Miller Systems' one-way distribution utilizes our web servicing technology, SMS|Diplomat to provide seamless integration with Cvent's Passkey.

Cvent's Passkey automates and streamlines your room block management process as it bridges the gap between registration and your room block, so you can sleep easy knowing that your attendees will, too.

Interface Benefits

SMS|Host's integration with Passkey results in overall improved efficiency, increased revenue, and better accuracy of information:

- Attendees can book within the block after registering for the event, from any device.
- Enable real-time reservations through secure payments directly into hotel reservation systems.
- See room pick-up in real-time and access reports

Communicated Information

Your SMS|Host system and the Passkey interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Reservations (new, modifications, and cancellations)

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current release of the SMS Product Suite
