

SMS|Host® Scheduled File Export with Shogo

Springer-Miller Systems' Scheduled File Export (SFE) provides a framework to support automated, schedulable, one-way exports of files in various formats from SMS|Host to complimentary hospitality systems.

Shogo is a cloud-based business automation service that automatically posts Point-of-Sale or eCommerce sales data to your accounting system.

Functionality

Acting as a protective gateway to your system, the SFE facilitates rapid and reliable access to files that a property wants to share with vendors or other external entities. Utilizing a flexibly configured scheduler, files designated for transport, either by naming convention or specific location, will be automatically forwarded to a validated set of SFTP credentials at the destination. This transmission mechanism accommodates the CSV export of a report, the output of a utility that has been run in the PMS or a file manually placed in a location for external transport.

Scheduled File Export Benefits

By employing Springer-Miller's SFE, properties gain the following benefits:

- **Security:** increased through elimination of direct/uncontrolled external access to SMS|Host
- **Protection:** reliance on SFTP ensures that all files are transported in an encrypted format
- **Reliability:** consistent and dependable delivery of data
- **Automation:** fully autonomous transport processing
- **Frequency:** scheduling ensures files are sent as expected
- **Economy:** the SFE can support multiple vendor exports from a single installation
- **Performance Safeguard:** reliance on an official export protects against unintended performance degradation

Concept of Shogo

Shogo utilizes data from the SMS|Host Back Office interface. The output file contains a summary of the day's financial activity by General Ledger number for a single property or separate files generated for individual multi-properties. The exported text file can be formatted as Comma Delimited (CSV), Tab Delimited, Fixed Length (separated by commas) or Standard Data Format (fixed length fields without separation).

Exported Content for Shogo

Contents

- SMS Back Office File Transfer (BO-IFACE)

Frequency

- The file should be generated nightly following the End-of-Day for the Period Ending with the prior date. If running as an Automated Night Audit Task, the export is defined as “1 day prior to the run date”.

Location

- The Scheduled File Export interface resides on the Legacy Interface Server and the files will be placed in \HOSTPLUS\EXPORT\SHOGO\.

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current release of the SMS Product Suite
- Multi-interface Processor (see Exhibit A, Rev. 5.0, Section 3, page 8 for details)
