

SMS|HOST® AND IVVY INTERFACE

Interface Functionality

Springer-Miller Systems' Sales & Catering interface with iVvy Venus utilizes our web servicing technology, SMS|Diplomat to provide seamless integration to iVvy.

iVvy software is designed to help venues, organizations, and planners to boost revenue, sell more function space, and streamline event management processes using automation and cloud-based technology. We bring venues, creators and suppliers together using a suite of smart software solutions, tailored coaching, and exceptional customer service so that creating & delivering amazing events becomes easier than ever.

Interface Benefits

The Sales & Catering interface enables hospitality managers to:

- Improve efficiency and eliminate costly data entry across multiple systems
- Receive & create new Group Information, Block, and Rates from iVvy
- Ability to manage group blocks in either system
- Ability to book group reservations in either system, as well as modify and cancel them
- Send base-line rate values to use for building rates in iVvy
- Deliver inventory and availability to iVvy

Communicated Information

Your SMS|Host system and iVvy sales & catering interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Group Creation (Function Only groups are optional)

Group Block updates (2-Way)

Future Group Reservation Counts (group pickup)
