

SMS|HOST® AND ALARM.COM INTERFACE

Interface Functionality

Springer-Miller Systems' Access Control interface with PointCentral's Alarm.com utilizes our web services technology, SMS|Diplomat to provide seamless integration.

Interface Benefits

The interface allows improved accuracy of information and overall efficiency through:

- Real-time delivery of guest reservations to Alarm.com
- The guest's access code is captured in SMS|Host and displayed in the reservation note.
- Alarm.com can synchronize guest data

Communicated Information

Your SMS|Host system and the Alarm.com Access Control interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Guest reservation notification

Capture of guest access code in SMS|Host

Synchronization of guest data

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current release of the SMS Product Suite
- Diplomat Type I or II server (see Exhibit A - Hardware Requirements document)

Please contact a PointCentral representative to learn more about their software and hardware requirements with Alarm.com.
