

SMS|HOST® AND JCM POS INTERFACE

Interface Functionality & Benefits

Springer-Miller Systems' Level 2 Point-of-Sale provides seamless integration with Jonas Club Software's JCM Point-of-Sale application.

Jonas Club Software is the industry-leading club management solution. Their fully integrated applications, innovative technology, and unrivaled services help to power your club operations, enhance your team, and engage your members. JCM POS allows you to efficiently manage your dining, retail and event operations with the most feature-rich point of sale software in the club industry.

Using the Jonas ARC Platform, the interface allows both systems to have improved accuracy of information and overall efficiency through:

- Creation, modification, and sync of JCM Member Profiles as Guest Tiles in SMS|Host
- Guest lookup by Reservation Number, Room Number, and Member Number
- Guest lookup by guest last name, including partial name search for reservations (INH, NEW, CNF)
- Account charge by Reservation/Account Number
- Check split – up to ten payments
- Charge Correction – full reversal, partial reversal,, and void
- Check zoom for single account charge and multiple room charges per check

Noteworthy: A maximum number of 8 sales item groupings, 1 total discount item, 5 taxes, and 1 tip can be defined in JCM.
