

SMS|HOST® AND DELPHI INTERFACE

Interface Functionality & Benefits

The enhanced integration between Springer-Miller Systems' ^{SMS|HOST} and Amadeus' Delphi® Sales & Catering platform delivers a unified solution that empowers hospitality teams to operate with greater precision, agility, and insight.

Using the Jonas ARC Platform and Amadeus's rich API, together these systems offer:

- Seamless data flow across platforms to eliminate redundant data entry and manual reconciliation
- Group business management empowers sales and operations teams to collaborate more effectively
- Flexible control and configuration allows properties to tailor workflows to their operational preferences
- Accelerated onboarding and transition with improved integration performance
- Built on industry-leading platforms offering a scalable and future-ready solution for properties of all sizes

One of the highlights of the enhanced integration encompasses flexibility in rate application between both systems. Rates input into Delphi will automatically be created in ^{SMS|HOST} upon creation of the group, utilizing a wide range of configuration options.
